8 Segmental reporting (Consolidated - unaudited)

The Mindteck Group's operations predominantly relate to providing software services to external customers and providing IT-enabled services to consolidated subsidiaries within the Group. The Group considers business segment as the primary segment and geographical segment based on the location of customers as the secondary segment.

Since IT-enabled services are rendered to subsidiaries which are consolidated, the disclosure of a separate IT-enabled services segment as a separate primary segment is not applicable. The Group is therefore considered to constitute a single primary business segment and accordingly primary segment disclosures have not been presented.

The accounting principles consistently used in the preparation of the consolidated financial statements are also consistently applied to record income and expenditure in the individual geographical segments.
