HITECH PARKING SOLUTIONS PRIVATE LIMITED

Notes to Standalone financial statements for the year ending March 31, 2019

1. Corporate information

Hitech Parking solutions private limited is a private limited company domiciled in India and was incorporated on March 14, 2018 under the provisions of the Companies Act, 1956 applicable in India. The company is incorporated as subsidiary of Mindteck India Ltd., which is engaged in the business of rendering engineering and IT services to customers across various industry verticals in specific service horizontal. Period for the first financials is from 14th March 2018 to 31st March 2019.

2. Basis of preparation and significant accounting policies:

2.1. Basis of preparation:

The standalone financial statements of the Company have been prepared and presented in accordance with accounting principles generally accepted in India including Indian Accounting Standards (Ind AS) specified under Section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

These standalone financial statements have been prepared on a historical cost basis, except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained further in the accounting policies below.

- certain financial assets and liabilities that is measured at fair value/amortized cost,

The standalone financial statements are presented in Rs. ('₹') and all the values are rounded off to the nearest Rupee except when otherwise indicated.

2.2. Summary of significant accounting policies

a) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realized in normal operating cycle or within twelve months after the reporting period
- Held primarily for the purpose of trading,
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified period of twelve months as its operating cycle.

b) Significant accounting judgements, estimates and assumptions

The preparation of the Company's standalone financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities, the accompanying disclosures, and the disclosure of contingent assets and contingent liabilities on the date of the standalone financial statements and the reported amounts of revenues and expenses for the year reported. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and future periods are affected.

Key source of estimation of uncertainty as at the date of standalone financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of the following:

Fair value measurement of financial instruments:

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

HITECH PARKING SOLUTIONS PRIVATE LIMITED
Notes to Standalone financial statements for the year ending March 31, 2019

b) Fair value measurement:

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability - or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

c) Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i. Financial assets:

Initial recognition and measurement:

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through Profit and Loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent measurement:

For purposes of subsequent measurement, financial assets are classified in three broad categories:

- Debt instruments assets at amortized cost
- Financial assets at fair value through Other Comprehensive Income ("OCI") (FVTOCI)
- Financial assets at fair value through Profit and Loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

When assets are measured at fair value, gains and losses are either recognized entirely in the standalone statement of Profit and Loss (i.e. fair value through Profit and Loss), or recognized in other comprehensive income (i.e. fair value through other comprehensive income).

ii. Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through Profit and Loss or at amortized cost, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

The Company's financial liabilities include trade payables, lease obligations, and other payables.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at amortized cost

After initial recognition, interest-bearing loans and borrowings and other payables are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in Profit and Loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the standalone statement of Profit and Loss.

HITECH PARKING SOLUTIONS PRIVATE LIMITED

Notes to Standalone financials statements for the year ending March 31, 2019

Derecognition:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the standalone statement of Profit and Loss.

iii. Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

iv. Reclassification of financial assets:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

d) Property, plant and equipment:

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant if the recognition criteria are met.

Capital work in progress is stated at cost. Capital work-in-progress comprises of expenditure incurred for construction of leasehold improvements. The cost comprises purchase price, borrowing costs if capitalization criteria are met, directly attributable cost of bringing the plant and equipment to its working condition for the intended use and cost of replacing part of the plant and equipment.

Property, plant and equipment are eliminated from financial statements, either on disposal or when retired from active use. Losses arising in case of retirement of Property, Plant and equipment and gains or losses arising from disposal of property, plant and equipment are recognized in standalone statement of Profit and Loss in the year of occurrence.

e) Depreciation and amortization:

Depreciation on property, plant and equipment with finite useful lives is calculated on a straight-line basis over the useful lives of the assets estimated by the management.

The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of property, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year and adjusted prospectively, if appropriate. The range of useful lives of the property, plant and equipment are as follows:

Property, plant and equipment	Useful lives estimated by the management (years)
Furniture and fixtures	5 years
Computer equipment	3 years
Office equipment	5 years
Vehicles	5 years

Leasehold improvements are amortized over the period of lease term or the estimated useful life of assets, whichever is shorter.

HITECH PARKING SOLUTIONS PRIVATE LIMITED**Notes to Standalone financials statements for the year ending March 31, 2019****g) Intangible assets:**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets are amortized on a straight-line basis over the estimated useful economic life. The Company uses a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. If the persuasive evidence exists to the affect that useful life of an intangible asset exceeds ten years, the Company amortizes the intangible asset over the best estimate of its useful life. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern and are treated as changes in accounting estimates.

The estimated useful lives of the amortizable intangible assets are as follows:

Category	Useful life
Computer software	3 years

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the standalone statement of Profit and Loss when the asset is derecognized.

k) Revenue recognition:

The Company derives its revenues from software and IT-enabled service including services provided to related parties.

Ind AS 115 was issued on March 28, 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited

Ind AS 115 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the

Effective April 1, 2018, the Company adopted Ind AS 115 "Revenue from Contracts with Customers" using the cumulative catch-up transition method,

The application of Ind AS 115 did not have significant impact on the financial statements.

Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration the Company expect to

The following specific recognition criteria must also be met before revenue is recognized:

Revenue from software services provided on a time-and-material basis is recognized upon performance of services and at the agreed contractual rates.

Revenue from implementation service under concession arrangement are recognized in line with Appendix D of Service Concession Arrangement

In case of multiple element arrangements for sale of software license, related implementation and maintenance services, the Company applies the

Provisions for estimated losses on contracts are recorded in the period in which such losses become probable based on the current contract estimates.

The Company collects goods and services tax and other taxes as applicable in the respective tax jurisdictions where the Company operates, on behalf of

ii. Other income:

Dividend income is recognized when the Company's right to receive dividend is established, which is generally when shareholders approve the dividend.

Interest income is recognized as it accrues in the standalone statement of Profit and Loss using effective interest rate method.

Rental Income from investment property is recognized as part of other income in the standalone statement of Profit or Loss on a straight-line basis over

iii. Service concession arrangements (SCA):

The Company implement or upgrades infrastructure (implementation or upgrade services) used to provide the smart/IT-based parking service and

Under Appendix D – Service Concession Arrangements to Ind AS 115 –Revenue from contracts with customers, the arrangement is accounted for based

The intangible assets model recognizes the asset to the extent of cost incurred or to be incurred (including certain obligations arising out the

HITECH PARKING SOLUTIONS PRIVATE LIMITED

Notes to Standalone financials statements for the year ending March 31, 2019

An asset carried under concession arrangements is derecognized on disposal or when no future economic benefits are expected from its future use or

The Company recognizes a financial asset to the extent that it has an unconditional right to receive cash or another financial asset from or at the direction

l) Foreign currencies:

Exchange differences arising on the settlement of monetary items or on reporting monetary items of Company at rates different from those at which they

The Company's standalone financial statements are presented in Rs. The Company determines the functional currency as Rs. on the basis of primary

Effective April 1, 2018, the Company has adopted Appendix B to Ind AS 21- Foreign Currency Transactions and Advance Consideration which clarifies

m) Taxes :

Tax expense comprises of current and deferred tax.

Current income tax:

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities based on the

Current income tax relating to items recognized outside Profit and Loss is recognized outside Profit and Loss (either in other comprehensive income or in

Minimum Alternative Tax ("MAT") credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay

Deferred tax:

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at
- In respect of taxable temporary differences associated with investments in subsidiaries when the timing of the reversal of the temporary differences

Deferred tax assets are recognized for all deductible temporary differences and the carry forward of any unused tax losses. Deferred tax assets are

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction
- In respect of deductible temporary differences associated with investments in subsidiaries deferred tax assets are recognized only to the extent that

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled,

Deferred tax relating to items recognized outside Profit and Loss is recognized outside Profit and Loss (either in OCI or in equity). Deferred tax items are

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and

n) Provision and contingencies:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of

HITECH PARKING SOLUTIONS PRIVATE LIMITED

Notes to Standalone financials statements for the year ending March 31, 2019

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks. Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting obligations under a contract exceed the economic benefits, are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events.

A contingent asset is disclosed, where an inflow of economic benefits is probable.

o) Earnings per share:

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of equity shares outstanding during the period are adjusted to reflect the effect of dilutive potential equity shares.

p) Employee stock compensation cost :

Employees (including senior executives) of the Company receive remuneration in the form of share-based payments in form of employee stock options. The Company measures compensation cost relating to employee stock options plans using the fair valuation method in accordance with Ind AS 102. The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using the Black Scholes valuation model. That service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the award vesting is assessed. No expense is recognized for awards that do not ultimately vest because non-market performance and/or service conditions have not been met.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

q) Segment reporting :

In accordance with Ind AS 108 - Operating segments, segment information has been provided in the consolidated financial statements of the Company.

r) Retirement and other employee benefits

Employee benefits include provident fund, ESI, gratuity and compensated absences.

Defined contribution plans:

Contributions payable to recognized provident funds, ESI which are defined contribution schemes, are charged to the standalone statement of Profit and Loss.

Defined benefit plans:

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the end of the reporting period. The Company has an employees' gratuity fund managed by the Life Insurance Corporation of India (LIC). Provision for gratuity liabilities, pending actuarial valuation, is recognized as a liability.

Short-term employee benefits:

Short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized during the year when the employees render the related services.

Long-term employee benefits:

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employees render the related services are recognized as a liability. The Company presents the entire compensated absences balance as a current liability in the balance sheet since it does not have an unconditional right to defer the payment of compensated absences to a later period.

HITECH PARKING SOLUTIONS PRIVATE LIMITED

Notes to Standalone financials statements for the year ending March 31, 2019

s) Cash and cash equivalents:

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding

Statement of cash flow:

Cash flows are reported using the indirect method, whereby profit/(loss) for the period is adjusted for the effects of transactions of a non-cash nature, any

t) Corporate Social Responsibility (CSR) expenditure:

CSR expense is recognized as it is incurred by the Company or when the Company has entered into any legal or constructive obligation for incurring
