AI CoE Team: Trainings

Bring the entire team on par on knowledge about storage, testing and AI/ML

Trainings Imparted

Training	Description	Status
Software Testing	Principles of software testing, scope, terminologies	COMPLETED
Storage Architecture and technologies	Different types of storage technologies, use cases	COMPLETED
Data storage in the age of AI	Transformation of storage technology and architecture for the AI	COMPLETED
Prompt Engineering	Concepts and principles of prompt engineering	COMPLETED
CNN/ANN	Introduction to Convolutional Neural Network and Artificial Neural Network	COMPLETED
Retrieval Augmented Generation (RAG)	Use cases and application of RAG	COMPLETED
Agentic AI	Introduction to Agentic AI and its use cases	COMPLETED
Multi-Agent Agentic AI	Expanding Agentic AI to multi-agent	PENDING
AI Test case generator	Generating test cases from requirements using LangChain and GPT4	PENDING
Software Testing workshop	Hands-on experience on software testing	PENDING
